

ANGEL REA

Architectural Designer | Revit BIM | Construction Documentation
New Jersey, USA | reaisrael84@gmail.com | (862) 304-2640 | [linkedin.com/in/angelrea/](https://www.linkedin.com/in/angelrea/)

Professional Summary

NJIT Bachelor of Architecture graduate with hands-on experience in BIM workflows, Revit-based construction documentation, and architectural production for residential, community, and educational projects. Experienced in developing coordinated drawing sets and 3D BIM models from schematic design through construction documentation, translating design intent, sketches, and field conditions into construction-ready deliverables. Strong focus on accuracy, model coordination, and production efficiency in fast-paced design environments.

Education

- Bachelor of Architecture – NJIT (2024)
- A.A.S. Architectural Technology with honors – Essex County College (2020)

Certifications

- Revit: From Zero to Expert
- Construction Management: Reading Drawings & Specifications
- BIM: Sustainable Design and Green Buildings
- Architectural Materials: Designing for Excellence and Sustainability

Experience

Architectural Designer (Freelance) — 2024–Present

- Developed Revit-based BIM models for residential renovation and small-scale architectural projects, ensuring coordinated alignment between 3D models and 2D construction documentation sets.
- Translated conceptual sketches, client requirements, and on-site measurements into accurate BIM models and permit-ready documentation using structured Revit workflows.
- Maintained model consistency and coordinated drawing updates across iterative revisions.

Residential Renovation Projects (Independent)

- Conducted site measurements and existing-condition analysis to support residential renovation design and space optimization.
- Participated in residential construction work, including framing, room additions, and interior layout modifications within existing structural conditions.

Academic Projects – NJIT

- Developed architectural projects from conceptual design through full construction documentation sets using Revit and AutoCAD workflows.
- Generated high-quality visualization outputs using Enscape and Lumion to communicate design intent, materiality, and spatial relationships.
- Applied sustainable design principles including passive lighting, site orientation, and material strategies within design proposals.

Technical Skills

- BIM & Drafting: Revit (Advanced), AutoCAD
- 3D Modeling & Visualization: Rhino, SketchUp, Enscape, Lumion
- Construction Documentation & Detailing: Permit sets, floor plans, sections, elevations, details
- BIM Workflow: Model coordination, sheet setup, families, drawing revisions
- Design Tools: Adobe Photoshop, Illustrator, InDesign, Microsoft Office
- Fabrication: 3D printing, laser cutting
- Design Knowledge: Building systems, material assemblies, passive design strategies
